### How to perfect the BBQ!!

#### Market Report by Paul Need

Dear all, the dairy market is on the up again which is difficult to believe at this time when milk is plentiful, however the butter consumption is high, with prices almost reaching an all-time high and trading £4800 pmt for Bulk. Mozzarella demand is extremely high for export and averaging at least £100 pmt more than the UK and across Europe.. even at June's pricing, so with that expect more increases. Cheddar pricing is rising and is expected to head north of £3000, how far we have to wait and see.

I think Q3 will be extremely difficult and at present there is nothing to suggest the market dropping in the near future but we all know that it could do the opposite very quickly. We will keep an extremely close eye on the market and make sure we can achieve the best pricing possible.

Some good news, we will be, in the very near future, launching a new look Spinneyfields across the range of grating, slicing and catering blocks, more news in July for start date.

If you need more information re market conditions please do not hesitate to contact myself or the team.

- Tip 1 - Once the BBQ is hot do NOT touch
- Tip 2 - Remember to make a salad to throw away
- Tip 3 - Prod and poke the meat often for no reason at all, this will make you look quite the expert
- Tip 4 - Balance a glass of your favourite drink on the side of the BBQ to increase your stress levels and test your reaction speed throughout the cooking process. *But most importantly,*
- Tip 5 - Check out our Spinneyfields slice range for the perfect finish to your BBQ burger!!

Did you know we do a range of Grated blends? (Perfect for pizza!!)

Ask a member of our team for more info.
